Forum Romanum

WFHSS Mission statement

“The WFHSS dedicates itself to the promotion of the worldwide harmonization of sterilization departments and of decontamination practices especially by providing:

- a meeting place for national and regional sterilization societies, thus stimulating cooperation and the exchange of information and best practices
- information via our website to all our stakeholders and interested parties

In this way we make a contribution to ensure that the quality of reprocessing is of the highest possible level across the globe”

The WFHSS supports national associations because:

- ❑ A “collective” approach is the fastest route to our goal: to put a device which meets a high quality standard at the disposal of the provider of care and of the patient
- ❑ A “collective” approach is a *conditio sine qua non* for “individual” progress

A national association provides:

- ❑ the ideal channel for the transfer of knowledge to the CSSD's
- ❑ a partner for the authorities

Definition of “State of art”:

“The highest level of development achieved at a particular time”

Sterilization department

Our inconvenient truth:

“The difference between sterilization departments is still quite big, sometimes way too big!”

Solidarity is the key to success!

Put expertise and knowledge at the disposal of others!

Every department should meet for itself maximal quality criteria!

“By believing in your dreams ...
you can turn them into reality”

Hergé

WFHSS

Thank you
